OBJECTIVE STATEMENT

A motivated software engineering graduate with a strong focus on learning and implementing cutting-edge technologies. I'm eager to take on new challenges and push boundaries to continuously enhance skills. I'm a detail-oriented problem solver with a strong work ethic and a proven track record of delivering high-quality results. Seeking opportunities to make valuable contributions to dynamic teams and projects.

KEY SKILLS & HONORS

Technical Skills: HTML, CSS, Version Control (Github), Reactjs(basic), Javascript(basic), C++

Tools: Visual Studio, VS Code, Antigravity, Cursor, Andriod Studio, Netbeans, Pycharm, Enterprise Architect, Packet Tracer, Frappe, Wireshark etc.

Tools and Technology familiarity: Postman, Docker, Jira, Trello, Zapier automation, Node.js, Express.js,

Soft Skills: Teamwork, Organization, Leadership, Communication, Problem-solving, Adaptability

Languages: English (Professional), French (Beginner), Urdu (Native), Punjabi (Native),

Key Honors:

- 3x Chancellor's Roll of Honor - 2021,22
- 5x Dean's Roll of Honor - 2021,22,23,24

EDUCATION

Capital University of Science and Technology (CUST)

Bachelor of Science in Software Engineering (BSSE)

Islamabad, Pakistan

sep. 2020 – Jul. 2024

- CGPA: 3.9/4.0
- Bronze Medalist
- Academic Excellence Scholarship(75%)

Punjab Group of Colleges

Intermediate in Computer Science

Gujar Khan, Pakistan

Aug. 2018 – June. 2020

- Grade: A

Seena Academy

Matriculation in Computer Science

Sohawa, Pakistan

2016 – Mar. 2018

- Grade: A+

EXPERIENCE

Working as Lab Engineer in Software Engineering Department CUST University.

Domain

1 year

- Information Security(Kali Linux)
- Computer networking on Cisco Packet Tracer
- Operating Systems(Linux, Windows, Mac os)
- Programming
- [Faculty Link](#)

PMS Requirement Engineering Project

Internship, Micro-Merger Pvt Ltd

- Implemented requirement engineering for a Property Management System, enhancing operational flow.
- Conducted stakeholder analysis and used UML diagrams to specify system requirements.
- Technologies used: Frappe framework, ERPNext, UML, Linux Command Line.

Community Service Volunteer

Volunteer Work and Community Service

- Organized self-development seminar, educating students on self-grooming.
- Organized seminar on cyberbullying and protection of rights in cyberspace.
- Contributed 65 hours of volunteer work, focusing on personal growth and serving society.

ACADEMIC PROJECTS

Final Year Project - Digital Logistics Platform

Project Member

- Designed a centralized transport management system to facilitate vehicle scheduling and shipment tracking.
- Enhanced driver employment through a digital marketplace, optimizing resource allocation.
- Technologies used: Flutter, Dart, Firebase, C++ , Android studio.

CERTIFICATIONS

- **IBM Full-Stack JavaScript Developer** (1/26-Present) - IBM
- **Aspire Leaders Program** (7/25-10/25) - Harvard Business School
- **Introduction to generative Artificial Intelligence** (7/2025) - Google Cloud
- **Agile Project Management** (10/2024) - Google
- **International Collegiate Programming Contest** (ICPC Regionals) – Participant, GIKI university
- **Visio Spark (Debugging Competition)** (03/2022) - 2nd Place, COMSATS University
- **8th ExclTe Cup** (Hackathon Competition) Developed ML/IoT solutions for medical field problems.
